

FIG. 1

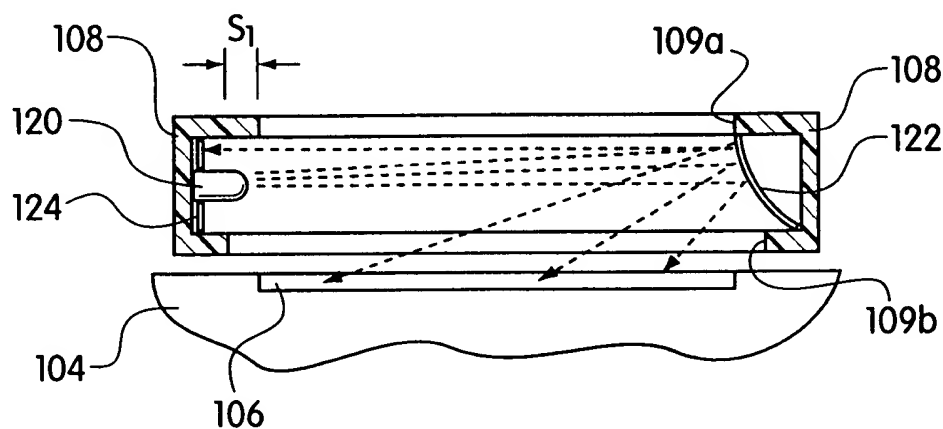

FIG. 2

A cross-sectional view of a curved structure, likely a portion of a lens or a curved surface. The structure is shown in a perspective view, with a central circular feature (120) and a surrounding layer (125). The outermost layer is labeled 108, and the innermost layer is labeled 124.

This diagram shows a cross-sectional view of a second embodiment of the device. It features a central rectangular cavity (132) within a substrate (108). The cavity is bounded by a top surface (135a) and a bottom surface (135b). Two circular components, labeled 130a and 130b, are positioned within the cavity, one near each end. The substrate has a hatched pattern on its outer edges.
